Just to name a few, we have more than 50 brands that are catered for the different types of needs for the entire country. These brands are processed and refined with optimum care and following Pakistan Standards and different ISO's. Having one of the largest supply chain networks in the country, these products are delivered from the factory to the end user, fresh & fast.

Palm Oil Imports

WGC is one of the largest importers of Crude Palm Oil, RBD Palm Oil and RBD Palm Olien from Malaysia and Indonesia. Being a Ghee/Cooking oil refiner & manufacturer itself, WGC is a big consumer of Palm Oil, the remaining portion of imports is sold to its clients consisting of mainly the ghee/cooking oil units installed in Pakistan. The bulk oil import activity is a continuous process which is carried out throughout the year. WGC enjoys a sound business relationship with Banks as the amount of imports is in large volume and Letters of Credit (L/C) established in this respect amount in millions of dollars every month and the group has excellent means, standing and respectability amongst the eyes of the Banks/DFIs related to the Group. The group plays its role in contributing towards national prosperity by paying heavy taxes annually and is one of the highest taxpayers amongst the Industrial Sector. Feroz Sons Tank Terminal (Pvt) Ltd, with a fleet of over 33 vehicles exclusively deployed for the storage and transportation of palm oil to various locations in Pakistan. The Terminal at Port Qasim, Karachi has storage capacity of 18,000 metric tons. The track record of this business segment is a glowing feather in WGC's cap.

Other imports

In addition to catering for the Palm oil requirements of its own Ghee/Cooking Oil manufacturing facilities as well as that of the various other manufacturers & traders in Pakistan WGC is a regular importer of other products related to manufacturing of Ghee/Cooking oil product line. These imports consist of various types of chemicals and food grade metals used in the food industry and are supplied to a large number of customers. The amount of imports is considerably high and is carried out on regular basis. Just like Palm Oil commodities, WGC's sister concerns consume a major portion of these imports to cater for their requirements of manufacturing of Ghee/Cooking oil products.

CNG Business

The introduction of CNG as fuel for motor vehicles was started in 1940. Use of CNG gradually spread- over worldwide as a substitute and being cheaper fuel it continued to be adopted by the users at an encouraging pace. In Pakistan, despite plenty of available reservoirs of natural gas, CNG was first introduced by Hydrocarbon Development Institute of Pakistan in 1982. Due to lack of resources and scarcity of CNG stations, the adaptation of CNG as a substitute for fossil fuel was very slow in Pakistan. Despite government's announcing of several incentives for the field, no one from the private sector was hesitant to enter the field. However, in 1993, WGC stepped forward and took the credit of launching the first CNG project in the private sector under the name & style of Kandaan Associates (Pvt) Ltd, Rawalpindi.
