

TRUMP TARIFF: **IMPLICATIONS & STRATEGIC** **OPTIONS FOR PAKISTAN**

POLICY BRIEF - 01

Policy Advisory Board of FPCCI

**Federation of Pakistan Chambers
of Commerce & Industry**

I. Introduction

On April 3, 2025, President Donald Trump announced a sweeping new trade policy, unveiling what he termed **“Liberation Day” tariffs** – a set of broad import tariffs targeting countries worldwide. This policy represents a dramatic escalation in U.S. protectionism, imposing a **universal 10% tariff on all imports** and significantly higher **“reciprocal” tariffs** on dozens of nations with which the U.S. runs trade imbalances. Implemented via executive order, the tariff program is aimed at **rebalancing trade, promoting U.S. manufacturing, and penalizing countries deemed to be “unfair” in trade practices**. Officially, the policy was introduced via a *“historic executive order instituting reciprocal tariffs”*, meaning the U.S. will mirror or respond to other nations’ trade barriers in kind. In short, it is a **reciprocal tariff regime**, whereby countries that, in Trump’s view, have long “cheated” or taken advantage of the U.S. are now confronted with equivalent tariffs when exporting to the United States. President Trump explicitly described the framework in plain terms: *“Reciprocal. That means they do it to us and we do it to them. Very simple.”*

This new tariff regime is unprecedented in scope. It establishes a **baseline import tax of 10% on all countries** (even traditional allies) and reciprocal tariffs on roughly 90 specific nations deemed “worst offenders” in terms of trade imbalances or restrictive practices. The policy consists of two main parts:

Base Tariff

- A flat **10% tariff on all imports** into the U.S., applied across the board to every country (with a few exceptions). This universal tariff took effect on April 5, 2025.

Reciprocal Country-Specific Tariffs

- Additional tariffs on specific countries with which the U.S. has large trade deficits or which impose higher tariffs on U.S. goods. These country-specific rates are set at varying levels (from 10% to 50%) depending on the country’s trade deficits. These targeted tariffs are scheduled to take effect on April 9, 2025

I.1. Trump’s Reciprocal Tariffs

The policy is sometimes also referred to by the administration as the **“reciprocal tariff” program or framework**, highlighting that the tariff rates were determined by looking at each country’s trade practices relative to the U.S.. In essence, the U.S. is saying that if a country has been charging high import duties on American exports (or otherwise limiting U.S. goods), the U.S. will now charge that country a similar fee for access to the American market – “half” of the partner’s rate, according to President Trump’s description. The details of US determined tariff and reciprocal tariffs are as follows along with average **Most-Favored Nation (MFN)** applied tariff rate in 2023. Some of the notable countries which are competitor of Pakistani products in US market includes, China, Viet Nam, Bangladesh, India, and Cambodia, in 2023, with USA applied MFN of 2.41%, 3.27%, 10.59%, 2.65%, and 7.1% respectively.

Note: The below reciprocal tariffs are in addition to the existing tariffs already imposed by USA on these countries.

Table I: Synopsis of Trump's Reciprocal Tariffs

S. No.	Country	Tariff Charged to US (%)	New US Tariff (%)	Average MFN Rate Applied to USA (2023)	S. No.	Country	Tariff Charged to US (%)	New US Tariff (%)
1	China	67%	34%	7.5%	26	Peru	10%	10%
2	European Union	39%	20%	5.0%	27	Nicaragua	36%	18%
3	Viet Nam	90%	46%	9.4%	28	Norway	30%	15%
4	Taiwan	64%	32%	6.5%	29	Costa Rica	17%	10%

22	Pakistan	58%	29%	10.3%	47	Laos	95%	48%
23	Turkey	10%	10%		48	Botswana	74%	37%
24	Sri Lanka	88%	44%		49	Trinidad and Tobago	12%	10%
25	Colombia	10%	10%		50	Morocco	10%	10%

1.2. Trump's Tariff Formula

The Trump administration described a **simple formula** behind the reciprocal tariff rates. Officially, President Trump stated that the U.S. would “charge them approximately **half of what they are and have been charging us**” – effectively **halving the foreign country's own tariff rate or trade barriers** to set the U.S. tariff. In practice, the White House indicated it considered **each country's import duties on U.S. products and other non-tariff barriers (like quotas and regulations)**, and then roughly divided that total impact by two. This was portrayed as an act of fairness (or in Trump's words, “*an act of great kindness*” to only charge half).

However, the calculation is more straightforward – and cruder – than the White House narrative. **Evidence implies that the tariff rates were set roughly equal to half of the U.S. trade deficit with each country as a percentage of U.S. imports from that country.** To be more precise, the United States has used below formula to calculate Reciprocal Tariff¹:

¹ <https://ustr.gov/issue-areas/reciprocal-tariff-calculations>

$$\nabla \tau = \frac{xi - mi}{\varepsilon * \varphi * mi}$$

Where;

xi – are the US's exports to partner country,

mi – are the US's imports from the partner country,

ε - price elasticity of import demand which is set at 4, and

φ – is the elasticity of import prices with respect to tariffs is set at 0.25

It's important to highlight that **this formula is a rough guiding rule rather than a precise public equation**. They have simply emphasized “reciprocity” and that the U.S. tariffs are “*still only half*” of what they claim those countries levy on U.S. exports. In some cases, the rates do roughly correspond to half of foreign tariffs. For instance, U.S. rhetoric argue that **Pakistan's 29% tariff** was justified because “*Pakistan charges a 58% import tariff on [U.S.] products*” (29% being half of 58%). Whether those foreign tariff figures are accurate is debatable, but this illustrates the rationale used.

Analysts have critiqued this approach as “*remarkably crude*”. It does not account for the complexities of trade (such as differences in product mix or supply chain integration) and assumes a direct deficit-based reciprocity. Nonetheless, the **core idea is that countries with bigger trade surpluses or higher barriers got slapped with higher U.S. tariffs**, roughly about half of the perceived “unfairness gap.”

1.3. Objectives of Policy Framework

The Trump administration outlined several **objectives** for the “Liberation Day” tariff policy. These goals are rooted in President Trump’s long-standing trade philosophy that the U.S. has been disadvantaged in global commerce and must take assertive action to correct course. The key objectives include:

Reduce U.S Trade Deficit

- A primary stated goal is to **shrink the trade deficit** that the U.S. runs with many countries. President Trump went so far as to declare the trade deficit a **national emergency**, claiming it “*threatens our security and our very way of life*”. Taxing imports, the policy aims to discourage imports and encourage more domestic consumption of U.S.-made goods.

Reclaim economic Independence

- The policy is couched in nationalist terms of **economic independence and security**. Trump characterized the tariffs as “*our declaration of economic independence*”, liberating the U.S. from reliance on foreign production. The objective is to reduce dependence on foreign supply chains (especially in strategic sectors) and ensure the U.S. can prosper without being, as he sees it, taken advantage of by other nations. This ties into a broader goal of **national security through economic strength**, where a strong domestic industrial base is viewed as crucial.

Increase U.S Bargaining Power

- Relatedly, the tariffs are seen as a negotiation tool. “*The tariffs give us great power to negotiate*,” Trump noted, suggesting that the U.S. can extract better trade terms or new bilateral deals by wielding the threat of these tariffs. This was a tactic he employed in his first term (e.g. with NAFTA renegotiation and China), and the new policy takes it to a far more expansive level. The objective is to make other nations more eager to come to the table to avoid or reduce tariffs.

Protect Key Industries for National security

- Although not always explicitly stated in the April 3 announcement, an underlying objective is protecting industries deemed vital to national security (a rationale used in previous tariffs on steel, aluminum, etc.). By imposing tariffs broadly, the U.S. hopes to protect sectors like **automotive, steel, technology, and machinery** from foreign competition, thereby maintaining domestic production capabilities that could be important in national emergencies. Indeed, Trump cited that “*if you want your tariff rate to be zero, then you build your product right here in America*”, highlighting a desire to onshore production in sectors like autos (which got a new separate 25% auto import tariff).

Boost Domestic Manufacturing & Jobs

- The tariffs are intended to **drive a resurgence of American manufacturing** by making imported goods more expensive and less competitive in the U.S. market. Trump argued this would lead to idle factories reopening and jobs returning. “*Jobs and factories will come roaring back*,” he proclaimed, envisioning a “*golden age*” for U.S. industry as companies produce more in America rather than offshore. This import-substitution objective is at the heart of Trump’s “*Make America Great Again*”.

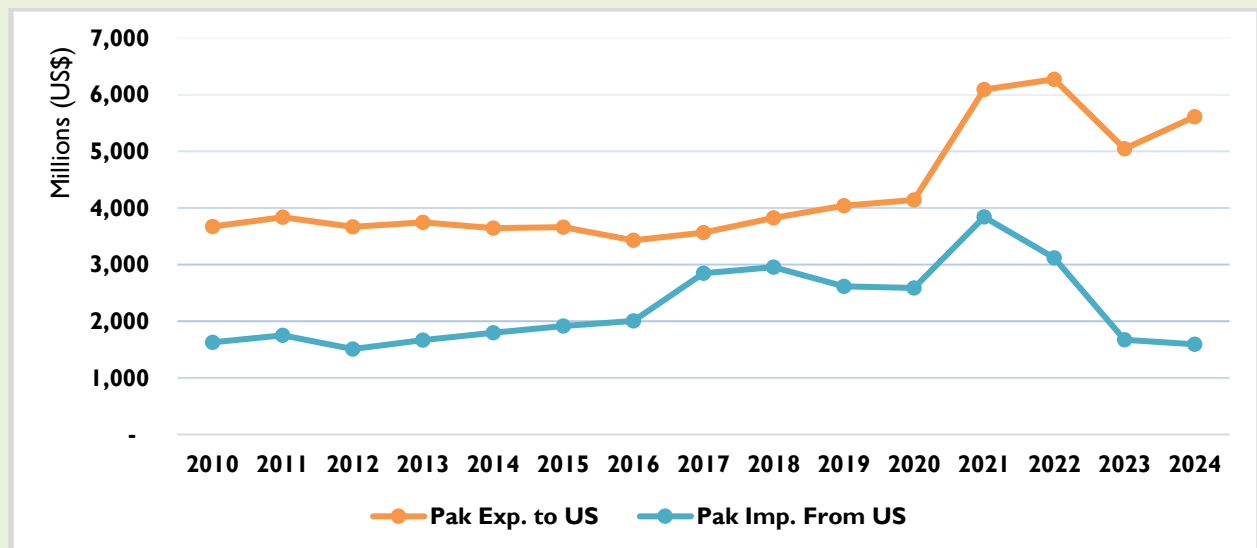

2. Bilateral Trade between Pakistan and United States

The trade data between Pakistan and the United States from 2010 to 2024 reveals several important trends. *Pakistan's exports to the US remained relatively stable from 2010 to 2016, fluctuating between US\$ 3.4 billion and US\$ 3.8 billion. However, from 2017 onwards, a gradual upward trend is visible, with exports crossing the US\$ 4 billion mark in 2019 and hitting a peak of over US\$ 6 billion in 2021 and 2022. Although there was a decline in 2023 to around US\$ 5 billion, exports rebounded in 2024 to US\$ 5.6 billion, signaling resilience and a potential recovery.*

Imports from the US into Pakistan also show interesting dynamics. From 2010 to 2016, they gradually increased from US\$ 1.6 billion to US\$ 2 billion. A significant jump occurred in 2017 and in 2018, peaking at nearly US\$ 3 billion, followed by fluctuations until a notable spike to US\$ 3.8 billion in 2021. However, imports fell sharply thereafter, especially in 2023 and 2024, possibly due to global economic factors, trade restrictions, or shift in sourcing strategies.

As a result, Pakistan consistently maintained a trade surplus with the US throughout the period. The surplus ranged between US\$ 2 billion to US\$ 2.1 billion in early years, narrowed notably between 2015 and 2018, but then it grew sharply from 2021 onwards. In 2024, the trade surplus highlights a growing advantage in bilateral trade. This expanding surplus reflects both rising exports and decreasing imports, positioning Pakistan favorably in trade relations with the US in recent years.

Figure 1: Pakistan and USA's Bilateral Trade

2.1. Pakistan's Exports to USA

In 2024, Pakistan's exports to the United States totaled **\$5.6 billion**, with the overwhelming majority concentrated in the **textile and apparel sector**, which accounted for over **77%** of total exports. The top three product categories were: **knitted or crocheted apparel (HS 61)** at **\$1.6 billion (28.7%)**, **other made-up textile articles (HS 63)** at **\$1.58 billion (28.1%)**, and **non-knitted apparel (HS 62)** at **\$1.14 billion (20.3%)**. This data underscores Pakistan's heavy reliance on the textile value chain for its trade with the U.S., reflecting both a strength in competitiveness and a vulnerability due to lack of product diversification.

Beyond textiles, a few sectors made modest contributions. **Cotton (HS 52)** exports amounted to **\$177 million (3.1%)**, while **leather goods (HS 42)** and **furniture and bedding (HS 94)** contributed **\$171 million (3.0%)** and **\$156 million (2.7%)**, respectively. Other export categories such as **plastics, medical instruments**, and **sugar products** ranged between **1% to 2.2%**, while all remaining products grouped under “Others” made up around **8%** of total exports. While these figures reflect some emerging diversification, the data highlights significant untapped potential in non-textile sectors that could help Pakistan build a more resilient and balanced export portfolio to the United States.

Table 2: Pakistan’s Top Exports to USA in 2024

S. No.	HS Code	Description	Pak’s Exports to USA in 2024 US\$ million	Sectoral % of Pak Exp. To US
Total Exports to USA			5,614	100%
1	61	Articles of apparel and clothing accessories, knitted or crocheted	1,615	28.7%
2	63	Other made-up textile articles; sets; worn clothing and worn textile articles; rags	1,578	28.1%
3	62	Articles of apparel and clothing accessories, not knitted or crocheted	1,143	20.3%
4	52	Cotton	177	3.1%
5	42	Articles of leather; saddlery and harness; travel goods, handbags and similar containers; articles	171	3.0%
6	94	Furniture; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings	156	2.7%
7	39	Plastics and articles thereof	127	2.2%
8	90	Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical	110	1.9%
9	17	Sugars and sugar confectionery	59.6	1%
10	25	Salt; sulphur; earths and stone; plastering materials, lime and cement	54.7	0.97%
Others			422.7	8.03

2.2. Pakistan’s Imports from USA

In 2024, **Pakistan’s imports from the United States stood at \$1.59 billion**, with a relatively balanced distribution across industrial, chemical, and textile-related categories. The largest import segment was **worn clothing and other made-up textile articles (HS 63)**, valued at **\$239 million (15%)**, followed by **raw cotton (HS 52)** at **\$213 million (13.35%)**, highlighting a unique textile-related two-way trade pattern between the two countries. The data reflects Pakistan’s reliance on the U.S. not just for finished goods but also for essential raw materials to fuel its domestic manufacturing and export industries.

Industrial goods also formed a significant share of imports. **Machinery and mechanical appliances (HS 84)** totaled **\$203 million (12.7%)**, while **mineral fuels and oils (HS 27)** came in close at **\$155 million**, suggesting the U.S. role in Pakistan’s energy and industrial infrastructure. Imports of **iron and steel (HS 72)** and **medical or precision instruments (HS 90)** added **\$121 million (9.7%)** and **\$92 million (5.8%)**, respectively. The remainder included **chemical products, pharmaceuticals, and wood pulp**, accounting for smaller but still valuable contributions. Altogether, non-textile items made up a significant portion of imports, indicating a more **diversified import profile** compared to the **textile-heavy export structure**. This contrast points toward an opportunity for Pakistan to diversify its own export offerings in order to reduce dependence on a few sectors.

Table 3: Pakistan's Top Imports from USA in 2024

S. No.	HS Code	Description	Pak's Imports from World	Pak's Imports from USA	Imp. From USA as % of Total
Pakistan's Imports from USA			56,522	1,593	2.82%
1	63	Other made-up textile articles; sets; worn clothing and worn textile articles; rags	496.5	239.2	48.2%
2	52	Cotton	907.06	212.8	23.5%
3	84	Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof	2,881.4	203.5	7.1%
4	27	Mineral fuels, mineral oils and products of their distillation; bituminous substances	17,807.7	155.4	0.1%
5	72	Iron and steel	3,092.4	121.4	3.9%
6	90	Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical	700.8	92.5	13.2%
7	38	Miscellaneous chemical products	808.1	58.4	7.2%
8	29	Organic chemicals	2,531.6	51.9	2.1%
9	47	Pulp of wood or of other fibrous cellulosic material; recovered	188.6	49.8	26.4%
10	30	Pharmaceutical products	774.3	47.3	6.1%

2.3. Tariff before Reciprocal Tariffs Imposed by USA on Pakistan and Regional Countries

The previous U.S. tariff structure reveals that **Pakistan enjoys a slight edge** over its regional competitors in several key export categories. For instance, Pakistan faces **marginally lower tariffs on apparel (HS 61 & 62)** compared to China, India, Bangladesh, and Vietnam. However, the imposition of a **new flat tariff—28% on Pakistani exports—neutralizes these relative benefits**, drastically altering the cost equation. With India now facing 26%, Bangladesh 37%, Vietnam 46% and China with combined 125%, Pakistan still, retains a moderate edge over most peers except India. This shift demands **urgent recalibration of export strategy**, focusing on **value-added products, trade diplomacy, and bilateral trade facilitation** to counter the new duty regime's impact. Without swift action, Pakistan's exports—especially in labor-intensive textile sectors—could lose traction in an increasingly protectionist U.S. market.

Table 4: Previous Tariff Structure imposed by USA on Pakistan & Regional Countries

HS Code	Description	Current Tariff Imposed by US ²				
		Pak	China	India	Bangladesh	Viet Nam
61	Articles of apparel and clothing accessories, knitted or crocheted	11.34%	11.45%	11.45%	11.45%	11.45%
63	Other made-up textile articles; sets; worn clothing and worn textile articles; rags	6.43%	6.82%	6.82%	6.82%	6.82%
62	Articles of apparel and clothing accessories, not knitted or crocheted	10.23%	10.32%	10.32%	10.32%	10.32%
52	Cotton	8.47%	8.59%	8.59%	8.59%	8.59%
42	Articles of leather; saddlery and harness; travel goods, handbags, and similar containers; articles	3.94%	8.89%	8.89%	8.89%	8.89%
94	Furniture; bedding mattresses, mattress supports, cushions, and similar stuffed furnishing	0.42%	2.45%	2.45%	2.45%	2.45%
39	Plastics and articles thereof	0.55%	4.56%	4.56%	4.56%	4.56%
90	Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical	0.04%	1.00%	1.00%	1.00%	1.00%
17	Sugars and sugar confectionery	9.15%	10.61%	10.61%	10.61%	10.61%
25	Salt; sulphur, earths and stone; plastering materials, lime and cement	0.00%	0.28%	0.28%	0.28%	0.28%

² These figures are calculated using simple average.

The revised tariff structure implemented by the United States on **April 9, 2025**, marks a significant shift in trade dynamics for Pakistan. While the average tariff on Pakistani goods was relatively moderate prior to April 2, 2025 – with key sectors such as apparel, home textiles, and medical instruments facing tariffs between **0.04% to 11.34%**. The newly imposed **flat average tariff of around 29%** represents a substantial escalation. This sharp increase particularly affects Pakistan's **top export categories to the U.S.**, including HS codes **61, 62, and 63** (apparel and textile products), which collectively accounted for nearly **US\$4.3 billion** of exports and over **75% of Pakistan's exports to the U.S.** The increased tariffs now **average over 39%** in following categories will reduce Pakistan's price competitiveness in its largest export market incase regional competitors negotiate a better bilateral agreement with the United States of America.

Furthermore, sector like **cotton, leather goods, plastics, furniture, and medical instruments** that previously enjoyed favorable or low tariff rates are now subject to the revised flat rates, which could hinder Pakistan's efforts to diversify its export base. For example, **furniture (HS 94)** and **Plastic (HS 39)**, which contributed significantly to exports with low tariffs of **0.42% and 0.55%** respectively, now face **29% plus duties**, risking the erosion of their market share. This tariff escalation may decline in export earnings in short-run, unless strategic interventions are made through diplomacy, market diversification, and internal reforms. **Moreover, a detailed product-wise revised duty structure for Pakistani goods for exports of top 10 chapters are provided in Annexure I.**

Table 5: Comparison of USA's Average Tariff on Pakistan before & after April 9, 2025

HS Code	Description	Pak's Exp. to World	Pak's Exp. to USA	Exports to USA % of Total	USA Tariff on Pak. As of April 1, 2025	USA Tariff on Pak. As of April 9, 2025 ³
Total		32,461	5,614	17.29%		
61	Articles of apparel and clothing accessories, knitted or crocheted	4,772	1,615	33.84%	11.34%	40.34%
63	Other made-up textile articles; sets; worn clothing and worn textile articles; rags	5,522	1,578	28.57	6.43%	35.43%
62	Articles of apparel and clothing accessories, not knitted or crocheted	3,940	1,143	29.01	10.23%	39.23%
52	Cotton	2,683	177	6.5%	8.47%	37.47
42	Articles of leather; saddlery and harness; travel goods, handbags, and similar containers; articles	659	171	25.94%	3.94%	32.94
94	Furniture; bedding mattresses, mattress supports, cushions, and similar stuffed furnishing	251	155	61.75%	0.42%	29.42
39	Plastics and articles thereof	528	127	24.05%	0.55%	29.55
90	Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical	462	111	24.02	0.04%	29.04
17	Sugars and sugar confectionery	549	60	10.92%	9.15%	38.15
25	Salt; sulphur, earths and stone; plastering materials, lime and cement	537	55	10.24%	0.00%	29%

³ This is simple average revised tariff for Pakistan from April 9, 2025. However, presently this is paused for 3 months, once amalgamated; the above revised tariffs will apply.

3. Analysis of Pakistan's Tariff Structure Applied to U.S.

As of April 9, 2025, **Pakistan's applied tariffs on U.S. imports remain modest**, with a majority of key industrial and consumer products facing **tariff rates below 10%**. For instance, cotton – a major U.S. exports to Pakistan is taxed at just 0.001% of weighted average tariff, while medical instruments and wood pulp are subject to only 1.06% and 0.50% respectively.

This tariff structure reflects Pakistan's relatively liberal trade regime for U.S, especially when contrasted with the new U.S. tariff escalation that now imposes 29% to 40% duties on key Pakistani exports (Paused for next 03 months). The data underlines that **Pakistan has not reciprocated with protectionist aggression**, instead maintaining open access to American goods to support local industrial needs and consumer affordability. It also indicates that the **U.S. narrative of tariff imbalance lacks empirical support**, and **constructive trade engagement**—rather than unilateral penalties—would better serve bilateral trade interests.

Table 6: The Average and Weighted Average Tariffs Applied by Pakistan to U.S.

S. No.	HS Code	Description	Pak. Tariff on USA as of April 9, 2025 ⁴	Pak. Tariff on USA as of April 9, 2025 ⁵	No. Tariff Lines Covered	Tariff Lines Covered in CGO
1	63	Other made-up textile articles; sets; worn clothing and worn textile articles; rags	3.16%	19.51%	88	0
2	52	Cotton	0.001%	10.68%	132	0
3	84	Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof	8.47%	7.42%	811	177
4	27	Mineral fuels, mineral oils and products of their distillation; bituminous substances	4.57%	6.87%	80	9
5	72	Iron and steel	1.90%	8.15%	210	147
6	90	Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical	1.06%	5.79%	192	14
7	38	Miscellaneous chemical products	8.57%	7.38%	148	21
8	29	Organic chemicals	1.75%	1.59%	582	39
9	47	Pulp of wood or of other fibrous cellulosic material; recovered	0.50%	3.20%	25	0
10	30	Pharmaceutical products	8.85%	10.24%	68	0

In the **HS-63 category**, nearly all tariff lines are already subject to a **20% customs duty**, with the exception of only **two lines currently used for imports from the United States**. Additionally, within **HS-84 (machinery)**, **177 out of 811 tariff lines** have been incorporated into the CGO, while in **HS-72 (iron and steel)**, **147 out of 210 lines** are covered. These figures highlight that a substantial portion of relevant tariff lines has already been addressed through the CGO. Therefore, during negotiations with the counterpart, it is essential to ensure that **the interests and protection of the domestic industry are not compromised**.

⁴ Pakistan's weighted average tariff on USA with respect to , used to normalize all values falling under respective chapters.

⁵ Pakistan's simple average tariff on USA

4. Recommendations

Increase Imports from US to Negotiate Free Trade Agreement (FTA)

- As discussed, in 2024, Pakistan's exports to US stood at US\$ 5.6 billion against imports of US\$ 1.5 billion. The Trump Tariff (28%) is primarily derived from US's trade deficit with Pakistan, thus, by diverting imports of US\$ 2.5-3 billion to USA, Pakistan can better negotiate a Free Trade Agreement

Negotiate a Trade Deal with Tariff attached with Import Content

- In 2024, out of Pakistan's total exports to US, textile accounted for 77% of total exports. Pakistan can divert/increase its "Cotton" imports from USA and may negotiate a 50% reduced or preferential tariff attached with import content. For example, a product with 40% import content of US sourced material may be subject to preferential tariff.

Diplomatic Engagement

- Pakistan must launch a robust diplomatic initiative by engaging high-ranking government officials and leveraging back-channel communications with key U.S. policymakers to articulate its strategic importance in regional security and defense; this effort should aim to secure targeted tariff exemptions or reductions by presenting detailed economic analyses, outlining mutual benefits for bilateral trade, and coordinating with allied nations to build a unified diplomatic front that underscores Pakistan's commitment to balanced trade practices and economic stability.

Diversify Export Markets

- Pakistan should design and implement a comprehensive market diversification strategy that includes the establishment of dedicated export promotion offices focused on high-growth regions such as the European Union, the Middle East, Asia, and Africa; this involves negotiating new bilateral and multilateral trade agreements, leveraging existing free trade agreements, conducting targeted market research to tailor products to local consumer preferences, and participating in international trade fairs to build brand recognition and secure long-term contracts outside the U.S. market.

Regional Integration and Collaboration

- To offset the impact of U.S. tariffs, Pakistan should deepen economic ties and trade cooperation with neighboring countries through active participation in regional alliances such as SAARC, ECO, and ASEAN+ initiatives; this effort would involve developing integrated supply chains, coordinating joint market entry strategies, sharing best practices for negotiating trade terms, and even exploring the creation of regional trading blocs that can collectively negotiate better terms with major trading partners, thereby enhancing overall regional resilience.

Enhance Product Diversification

- The country needs to transition from a heavy reliance on basic textile exports by investing in research and development and establishing innovation hubs that can support the creation of higher-value products—such as technical textiles, designer apparel, and advanced non-textile goods (e.g., optical instruments, precision medical devices, and pharmaceuticals)—while simultaneously promoting product standardization and quality certifications to gain entry into premium international markets and reduce sensitivity to tariff-induced price increases.

Research Team:

Mr. Bilawal – Head of Policy Research Unit

Ms. Uroosa Rasheed – Research Associate
