1. Bilateral Trade Performance and Product Composition

Trade between Pakistan and Indonesia has remained heavily skewed in Indonesia's favour over the past two decades, as shown in Figure 1. Pakistan's exports to Indonesia increased from **USD 62.0 million in 2006** to an estimated **USD 107.8 million in 2025**, implying a modest **20-year CAGR of around 3%**. Exports did rise sharply to a **temporary peak of about USD 504.7 million in 2024**, but this surge proved short-lived, with earnings falling back to near-historical levels in 2025. In contrast, Pakistan's imports from Indonesia expanded from **USD 809.0 million in 2006** to roughly **USD 4.3 billion in 2025**, corresponding to a robust **20-year CAGR of about 9%**. As a result, Pakistan's bilateral trade deficit with Indonesia widened significantly—from **USD 747.0 million in 2006** to nearly **USD 4.2 billion in 2025**—underscoring a **persistent and structurally imbalanced trade relationship** in which import growth has far outpaced export performance.

The export CAGR of about **3%** compared to import CAGR of about **9–11%** (depending on period and source) is consistent with other analyses of the IP-PTA era, which already flagged that Pakistan's imports from Indonesia have grown at least **10% annually** while exports have barely moved. The **2024 export spike** relates to a few commodity-specific surges (notably cereals and some agri items), but the sharp drop in 2025 suggests this was **not a structural gain** and that Pakistan's export base to Indonesia remains narrow and volatile. By 2025, Indonesia accounts for roughly **6–6.3% of Pakistan's total imports**, but **only around 0.5% of total exports**, reinforcing the conclusion that Pakistan has **not effectively leveraged** the preferential market access under IP-PTA and subsequent arrangements.

1.1. Composition and Growth of Pakistan's Top Exports to Indonesia

Pakistan's export basket to Indonesia is **narrow and commodity-heavy**, with a few products dominating both value and growth over the past two decades. In 2025, exports were heavily concentrated in six main HS-02 chapters. 'Cereals' (HS-10) remained the single largest export, at **USD 19.7 million** and **18%** of Pakistan's total exports to Indonesia. 'Tobacco and manufactured tobacco substitutes' (HS-24) ranked second, with exports of **USD 18.0 million** and a **17%** share, while 'Raw hides and skins (other than furskins) and leather' (HS-41) stood third, at **USD 13.3 million** and **12%** of the total. 'Cotton' (HS-52) was the fourth-largest export, with **USD 11.7 million** and an **11%** share,

followed by ‘Salt; sulphur; earths and stone; plastering materials, lime and cement’ (HS-25), at **USD 7.9 million and 7%**, and ‘Edible fruit and nuts; peel of citrus fruit or melons’ (HS-08), at **USD 7.5 million and 7%** of Pakistan’s exports to Indonesia. Together, these six chapters account for roughly **72%** of Pakistan’s export earnings from the Indonesian market in 2025.

In terms of **long-term export growth**, the pattern is mixed but reveals pockets of strong performance. ‘Salt; sulphur; earths and stone; plastering materials, lime and cement’ (HS-25) has been Pakistan’s fastest-growing export to Indonesia, with a **20-year CAGR of 46%**. ‘Tobacco and manufactured tobacco substitutes’ (HS-24) also performed strongly, recording a **36%** 20-year CAGR, while ‘Articles of apparel and clothing accessories, knitted or crocheted’ (HS-61) achieved a **23%** CAGR. ‘Cereals’ (HS-10) grew at a solid **16%** CAGR, and ‘Ores, slag and ash’ (HS-26) at around **14%**, albeit based on a shorter 17-year data series. ‘Raw hides and skins (other than furskins) and leather’ (HS-41) expanded at a more moderate but still positive **11%** CAGR. In contrast, ‘Cotton’ (HS-52), despite being an important export in value terms, posted a **negative 20-year CAGR of -7%**, indicating an overall decline in Pakistan’s cotton exports to Indonesia over the period.

The **Revealed Comparative Advantage (RCA)** indicators suggest that Pakistan holds a **clear comparative advantage** in most of its major export lines to Indonesia. In 2025, RCA values were well above 1 for ‘Cereals’ (HS-10; RCA 14.53), ‘Tobacco’ (HS-24; RCA 2.16), ‘Raw hides and skins and leather’ (HS-41; RCA 7.51), ‘Cotton’ (HS-52; RCA 40.99), ‘Salt and related materials’ (HS-25; RCA 7.60), ‘Articles of apparel, knitted or crocheted’ (HS-61; RCA 14.74), and ‘Fish and crustaceans’ (HS-03; RCA 2.63). This confirms that Pakistan is **relatively competitive** in these product categories and has a strong export orientation in them. However, Pakistan does **not** exhibit a revealed comparative advantage in ‘Ores, slag and ash’ (HS-26; RCA 0.51) and ‘Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical instruments’ (HS-90; RCA 0.53), where RCA values remained below 1 in 2025.

Overall, the evidence points to an export structure that is **highly concentrated in a few primary and semi-processed commodities**, with strong growth and comparative advantage in some chapters (e.g. cereals, tobacco, cotton, leather, salt, and apparel) but limited diversification into higher-value, technology-intensive products. This pattern has important implications for Pakistan’s future export strategy towards Indonesia: there is scope to consolidate competitive strengths in these core products, while simultaneously **broadening the export base** into more sophisticated goods where Indonesia’s demand is large and Pakistan’s current presence is marginal.

1.2. Composition and Growth of Pakistan's Top Imports from Indonesia

Pakistan's imports from Indonesia are **highly concentrated in a small number of HS-02 product groups**, with one category—fats and oils—dominating the bilateral import profile. In 2025, 'Animal, vegetable or microbial fats and oils and their cleavage products; prepared edible fats...' (HS-15) remained by far the largest import, with a value of **USD 3.52 billion** and an overwhelming **81% share** of Pakistan's total imports from Indonesia. This single chapter has not only maintained its dominance over time, but also recorded a strong **20-year CAGR of 13%**, underscoring its central role in Pakistan's import dependence on Indonesia.

The second-largest import category in 2025 was 'Man-made staple fibres' (HS-55), with imports of **USD 171.4 million** and a **4%** share, followed by 'Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral...' (HS-27), at **USD 89.9 million** and **2%** of total imports. Other notable import groups included 'Vehicles other than railway or tramway rolling stock, and parts and accessories thereof' (HS-87), with **USD 84.5 million** and a **2%** share; 'Paper and paperboard; articles of paper pulp, of paper or of paperboard' (HS-48), at **USD 69.2 million** and **2%**; and 'Organic chemicals' (HS-29), at **USD 52.0 million** and **1%**. Several smaller but fast-growing categories—such as 'Cocoa and cocoa preparations' (HS-18), 'Essential oils and resinoids; perfumery, cosmetic or toilet preparations' (HS-33), 'Edible fruit and nuts; peel of citrus fruit or melons' (HS-08), and 'Pharmaceutical products' (HS-30)—each accounted for around **1%** of Pakistan's imports from Indonesia in 2025.

In terms of **long-term growth**, the data show that some relatively small categories have grown very quickly, while a major category in energy has actually declined. Among Pakistan's top import groups from Indonesia, 'Cocoa and cocoa preparations' (HS-18) and 'Pharmaceutical products' (HS-30) recorded the fastest expansion, each with a **20-year CAGR of 23%**. 'Essential oils and resinoids; perfumery, cosmetic or toilet preparations' (HS-33) followed with a **20% CAGR**. The dominant HS-15 fats and oils category grew at a robust **13% CAGR**, while 'Man-made staple fibres' (HS-55), 'Vehicles' (HS-87), and 'Organic chemicals' (HS-29) each expanded at around **8%** annually over the period. In contrast, 'Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral...' (HS-27) recorded a **negative 20-year CAGR of -2%**, indicating that Indonesia's share in Pakistan's fuel imports has declined over time, even though the absolute level remains significant.

Taken together, these trends highlight a **structural concentration** of Pakistan's imports from Indonesia in HS-15 fats and oils—largely palm oil and related products—alongside a set of smaller, but diversifying, import streams in textiles, chemicals, processed foods, cosmetics, pharmaceuticals, vehicles, and paper. This pattern has important implications for Pakistan's trade and industrial policy: while the reliance on Indonesian fats and oils reflects cost and supply considerations, it also contributes heavily to the bilateral trade deficit and exposes Pakistan to commodity-specific shocks. At the same time, the strong growth in value-added categories such as cocoa

preparations, pharmaceuticals, and perfumery/cosmetics suggests emerging areas of integration that could be further leveraged or balanced through targeted export and investment strategies.

2. Trade Complementarity between Pakistan and Indonesia

The Trade Complementarity Index (TCI) for Pakistan and Indonesia over 2006–2025 shows a **clear asymmetry in trade compatibility**. Indonesia's export structure exhibits a substantially stronger alignment with Pakistan's import demand than Pakistan's export structure does with Indonesia's import requirements (Figure 2).

Figure 2: Pakistan–Indonesia Trade Complementarity Index (2006–2025)

Source: Authors' estimates based on ITC Trade Map data

2.1. Pakistan's Export Complementarity with Indonesia's Import Demand

Pakistan's export complementarity with Indonesia's import demand remained **persistently low** throughout 2006–2025, fluctuating in a narrow band of **22%–25%**. The index rose from **22% in 2006** to **23% in 2007**, reached **24% in 2008–2009** and **25% in 2010–2011**, and then fell back to **22% in 2012–2013**. It edged up to **23% in 2014**, declined again to **22% in 2015**, and subsequently recovered to **23% in 2016**. Between **2017 and 2021**, the index hovered around **24%**, before easing to **23% in 2022**, rising to **24% in 2023**, peaking at **25% in 2024**, and settling at **24% in 2025**.

These consistently low values indicate that **Pakistan's global export profile is only weakly aligned with Indonesia's global import demand structure**. Minor year-to-year movements did not change the fundamental picture: over two decades, Pakistan's export composition has not evolved in a way that significantly increases its compatibility with Indonesia's import needs.

2.2. Indonesia's Export Complementarity with Pakistan's Import Demand

By contrast, Indonesia's export complementarity with Pakistan's import demand remained **substantially higher**, fluctuating within a range of **59%–70%** during 2006–2025. The index increased from **63% in 2006** to **64% in 2007–2008**, rose further to **66% in 2009–2010**, and reached a peak of **70% in 2011**. It then declined gradually to **69% in**

2012, 67% in 2013, and 66% in 2014, and dropped more sharply to 62% in 2015. From 2016 to 2021, it remained between 59% and 61%, recovered to 63% in 2022, and then eased to 61% in 2023 and 60% in 2024–2025.

Even with the decline from its peak, the index has **consistently remained far above Pakistan’s export complementarity scores**, implying that **Indonesia’s export basket is structurally much better aligned with Pakistan’s import requirements** than vice versa. In practical terms, this means Indonesia can supply a large share of the products Pakistan demands, whereas Pakistan supplies only a limited share of the products Indonesia imports.

3. Identifying Pakistan's Export Potential in the Indonesian Market

Pakistan's **estimated export potential** in the Indonesian market averaged **USD 15.2 billion** during 2021–2025, indicating that actual exports remain far below what is theoretically achievable given Indonesia's import demand and Pakistan's global export capacity (Table 3). At the HS-02 level, Pakistan's top ten potential export product groups span both traditional and non-traditional sectors, with particularly large untapped opportunities in agri-commodities, textiles, metals, and selected manufactured goods.

'Cereals' (HS-10) stand out as the **single largest potential export**, with an estimated average potential of **USD 2.9 billion** over 2021–2025. This reflects Indonesia's substantial global imports of cereals and Pakistan's strong global export base in rice and other cereals. 'Cotton' (HS-52) is the second-largest opportunity, with an estimated potential of **USD 1.7 billion**, underlining Pakistan's comparative advantage in cotton and textiles and Indonesia's significant import needs for raw materials and semi-processed inputs.

Beyond these two core commodities, several other product groups offer sizeable export prospects. 'Copper and articles thereof' (HS-74) have an estimated export potential of **USD 823.6 million**, suggesting Pakistan could expand its presence in metal and semi-manufactured copper products. 'Salt; sulphur; earths and stone; plastering materials, lime and cement' (HS-25) show potential of about **USD 476.2 million**, while 'Articles of leather; saddlery and harness; travel goods, handbags and similar containers; articles...' (HS-42) have a potential of roughly **USD 467.9 million**—both pointing to scope for higher-value and more diversified exports in minerals and leather-based manufactured goods.

Additional opportunities are identified in a range of more technology- and value-added products. 'Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical instruments' (HS-90) have an estimated potential of **USD 458.7 million**, reflecting Indonesia's growing import demand for precision and medical equipment and Pakistan's emerging capacity in these sectors. 'Meat and edible meat offal' (HS-02) show a potential of **USD 441.5 million**, and 'Fish and crustaceans, molluscs and other aquatic invertebrates' (HS-03) about **USD 429.1 million**, highlighting the possibility of leveraging Pakistan's agri-food and fisheries base for halal and processed food exports. 'Plastics and articles thereof' (HS-39) and 'Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral...' (HS-27) each have estimated export potential in the range of **USD 409–421 million**, indicating room for expansion in industrial inputs and energy-related products.

Taken together, these findings suggest that Pakistan's current export performance to Indonesia captures only a **small fraction** of the available potential across multiple sectors. While cereals and cotton remain the anchor opportunities, there is considerable scope to **diversify and upgrade Pakistan's export basket** into metals, minerals, leather goods, precision instruments, halal meat and seafood, plastics, and selected energy-related products. Realizing this potential will require a combination of targeted market access efforts, product upgrading, compliance with Indonesian regulatory standards, and strengthened business-to-business linkages.

4. Current Tariff Regime between Pakistan and Indonesia

This section provides an overview of the current tariff structures applied by Pakistan and Indonesia, focusing on the distribution of tariff lines across different duty bands and the product groups benefiting from duty-free treatment.

4.1. Tariffs Applied by Indonesia on Imports from Pakistan

Indonesia's MFN tariff structure is **heavily concentrated in the lower tariff bands**, with the majority of tariff lines facing duties of **10% or less** (Figure 3). Out of a total of **11,414 tariff lines**, **5,667 lines (50%)** carry tariffs between **0% and 10%**, and an additional **1,489 lines (13%)** are duty-free. Taken together, this means that **63% of Indonesia's tariff schedule** is covered by rates of **10% or below**, indicating a relatively liberal tariff framework for a large share of products imported from Pakistan.

Higher tariff protection applies to a comparatively smaller portion of the tariff schedule. Around **2,808 tariff lines (25%)** are subject to tariffs above 10% but not exceeding 20%, while **1,381 lines (12%)** face tariff rates between 20% and 50%. Tariff lines with very high duties are limited: only **34 lines (less than 1%)** fall in the 50–100% band, and **29 lines (less than 1%)** carry tariffs exceeding 100%. This distribution shows that, while Indonesia maintains significant protection for selected sensitive products, its overall tariff profile is skewed towards **low and moderate tariff rates**.

Figure 3: Indonesia's Current Tariff Structure by Tariff Category

Source: Authors' estimates based on ITC data

Indonesia's duty-free tariff lines are clustered in several major product categories (Table 4). Of the **1,489 duty-free lines**, the largest number is found in **'Machinery and mechanical appliances; electrical equipment; parts thereof; ...' (Section 16)**, which accounts for **442 lines**. This is followed by **'Products of the chemical or allied industries' (Section 6)** with **214 lines**, and **'Wood and articles of wood; ...' (Section 9)** with **144 lines**. Other important duty-free categories include **'Base metals and articles of base metal' (Section 15)** with **140 lines**, **'Vehicles, aircraft, vessels and associated transport equipment' (Section 17)** with **91 lines**, and **'Mineral products' (Section 5)** with **84 lines**.

Among agricultural and primary sectors, **‘Vegetable products’ (Section 2)** and **‘Live animals; animal products’ (Section 1)** account for **70** and **56 duty-free lines**, respectively, while **‘Animal or vegetable fats and oils’ (Section 3)** and **‘Prepared foodstuffs’ (Section 4)** have **25** and **26 duty-free lines**. At the other end of the spectrum, categories such as **‘Articles of stone, plaster, cement, asbestos, mica or similar materials; ...’ (Section 13)** and **‘Works of art, collectors’ pieces and antiques’ (Section 21)** record the lowest numbers of duty-free tariff lines, with **4** and **3 lines**, respectively. A detailed product-wise listing of duty-free tariff lines is provided in Annex-I.

4.2. Tariffs Applied by Pakistan on Imports from Indonesia

Pakistan’s MFN tariff structure exhibits a **relatively higher concentration of tariff lines in the medium-tariff bands** compared with Indonesia, with a significant proportion of products facing duties between 20% and 50%. Out of a total of **7,579 tariff lines**, **2,547 lines (34%)** are subject to tariffs in the **20–50%** range, making this the single largest band in Pakistan’s tariff schedule (Figure 4). This is followed by **2,251 duty-free lines (30%)**, and **1,627 lines (21%)** that fall within the **10–20%** tariff range.

A smaller share of tariff lines is subject to low tariff rates: **1,050 lines (14%)** face duties between **0% and 10%**, indicating that only a limited portion of Pakistan’s tariff schedule is currently liberal at the very low end of the tariff spectrum. Very high tariffs are applied to a narrow set of products, with **103 lines (1%)** subject to tariffs between

50% and 100%, and only **one tariff line** carrying a duty exceeding **100%**. Overall, the distribution suggests that Pakistan relies more heavily on **medium-level protection** (20–50%) than Indonesia, while still maintaining a sizeable block of duty-free lines in key industrial and intermediate sectors.

Figure 4: Pakistan's Current Tariff Structure by Tariff Category

Source: Authors' estimates based on ITC data

Pakistan's duty-free tariff lines are concentrated in several major industrial product categories (Table 5). Of the **2,251 duty-free lines**, the largest number is in '**Products of the chemical or allied industries**' (Section 6), which accounts for **836 lines**. This is followed by '**Machinery and mechanical appliances; electrical equipment; parts thereof; ...**' (Section 16) with **538 duty-free lines**, and '**Base metals and articles of base metal**' (Section 15) with **249 lines**. Other significant categories benefiting from zero tariffs include '**Textiles and textile articles**' (Section 11) with **113 lines**, '**Optical, photographic, cinematographic, measuring, checking, precision, medical or surgical instruments ...**' (Section 18) with **105 lines**, and '**Mineral products**' (Section 5) with **102 duty-free lines**.

Among the remaining categories, '**Wood and articles of wood**' (Section 9) and '**Plastics and articles thereof; rubber and articles thereof**' (Section 7) account for **70** and **51 duty-free lines**, respectively, while '**Raw hides and skins, leather, furskins and articles thereof**' (Section 8) and '**Articles of stone, plaster, cement, asbestos, mica or similar materials**' (Section 13) have **48** and **29 lines**. Some categories record very few duty-free lines, such as '**Vegetable products**' (Section 2) with **27 lines**, '**Prepared foodstuffs**' (Section 4) with **6 lines**, '**Vehicles, aircraft, vessels and associated transport equipment**' (Section 17) with **3 lines**, and '**Live animals; animal products**' (Section 1) with only **1 duty-free line**. This pattern suggests that Pakistan has chosen to concentrate duty-free access in **industrial inputs, machinery, chemicals, and selected base metals**, while maintaining higher tariffs on many primary products and finished consumer goods. A detailed product-wise listing of duty-free lines is provided in Annex-II.

5. Policy Recommendations

The preceding analysis highlights three core features of Pakistan–Indonesia trade: (i) a large and persistent bilateral trade imbalance driven by Pakistan’s strong import dependence and weak export performance; (ii) narrow and commodity-heavy export and import baskets; and (iii) an asymmetric pattern of trade complementarity, where Indonesia’s export structure aligns much better with Pakistan’s import demand than vice versa. In light of these findings, the following policy recommendations are proposed.

5.1. Rebalancing Bilateral Trade through Targeted Export Promotion

- a) **Prioritize high-potential products in export strategy:** The export potential estimates point to sizeable untapped opportunities in **cereals (HS-10), cotton (HS-52), copper products (HS-74), salt and related minerals (HS-25), leather goods (HS-42), precision instruments (HS-90), meat and fish (HS-02, HS-03), plastics (HS-39),** and selected **energy-related products (HS-27)**. These sectors should be explicitly prioritized in Pakistan’s Indonesia-focused export strategy, with product-wise targets and timelines.
- b) **Use IP-PTA and future negotiations to deepen market access in potential sectors:** Pakistan has not effectively leveraged the preferential access under the IP-PTA. Future reviews and renegotiations should focus on **reducing Indonesian tariffs and non-tariff barriers** in high-potential sectors (e.g. cereals, cotton textiles, leather goods, precision instruments, halal meat and seafood), and on **simplifying rules of origin** to make preferences more usable.
- c) **Strengthen B2B linkages and distribution channels in Indonesia:** Pakistan’s presence in Indonesian value chains is limited. Trade missions, business councils, and chambers should focus on **building long-term relationships with Indonesian importers, distributors, and retail networks**, including halal food chains, modern trade outlets, and healthcare distributors.

5.2. Concentration Risk

- a) **Mitigate over-dependence on HS-15 fats and oils via diversification and negotiation:** With **81% of imports from Indonesia concentrated in HS-15 fats and oils**, Pakistan is exposed to commodity-specific shocks and price volatility. Policy options include:
 - a. **Diversifying sources** of palm oil and related products across multiple supplier countries.
 - b. **Negotiating price-risk management and supply-security clauses** within the bilateral framework.
 - c. Encouraging **domestic value addition** in fats and oils (e.g. downstream processing, branded consumer products) to capture more value locally.
- b) **Monitor and strategically manage fast-growing value-added imports:** Rapid growth in imports of **cocoa preparations (HS-18), pharmaceuticals (HS-30), cosmetics/perfumery (HS-33),** and **processed food products** suggests evolving consumption patterns and industrial needs. Policy should differentiate between **critical industrial inputs**, which merit facilitative treatment, and **finished consumer goods**, which may require calibrated protection to support domestic industry.

5.3. Addressing Structural Trade Complementarity Gaps

- a) **Align export development with Indonesia’s import demand profile:** The Trade Complementarity Index shows Pakistan’s export structure matches only **22–25%** of Indonesia’s import demand, compared with **59–70%** alignment in the reverse direction. Export strategy should be explicitly based on **Indonesia’s import profile**, identifying where Pakistan can competitively supply what Indonesia already imports in large volumes (e.g. cereals, cotton and textiles, certain chemicals and plastics, food products).
- b) **Use RCA and TCI together to set priorities:** High RCA values in **cereals, cotton, leather, salt, apparel, and fish** indicate areas of comparative advantage, but TCI reveals that Pakistan’s export mix still does not match Indonesia’s demand well. Policy should **prioritize products with both high RCA and high/medium TCI**

potential, and de-emphasize products where RCA is low and complementarity is limited (e.g. some machinery or optical instruments where Pakistan's presence is marginal).

5.4. Tariff and Regulatory Cooperation

- a) **Seek reciprocal and balanced tariff concessions:** Indonesia's MFN tariff schedule is relatively liberal at low bands (63% of lines at $\leq 10\%$), while Pakistan relies more on **medium-level protection (20–50%)** and concentrates duty-free access in industrial inputs and machinery. In future bilateral discussions, Pakistan should seek **additional tariff concessions in Indonesia** for priority export sectors, while carefully reviewing where Pakistan's own medium-level tariffs on Indonesian products could be **re-calibrated** to support industrial competitiveness without exacerbating the trade deficit.
- b) **Promote mutual recognition and standards cooperation:** For sectors such as **halal meat, fisheries, pharmaceuticals, and medical devices**, tariff preferences alone will not unlock potential unless **regulatory and standards barriers** are addressed. Pakistan and Indonesia should explore **mutual recognition arrangements, harmonization of halal standards, and joint certification programs**, particularly for food and health-related exports.
- c) **Improve utilization of existing preferences through awareness and compliance:** Many Pakistani exporters are either unaware of, or unable to comply with, the technical and documentary requirements for utilizing IP-PTA concessions. TDAP, FPCCI, and sector associations should run **targeted awareness campaigns and compliance support programs** to raise utilization rates of existing preferences in the Indonesian market.
